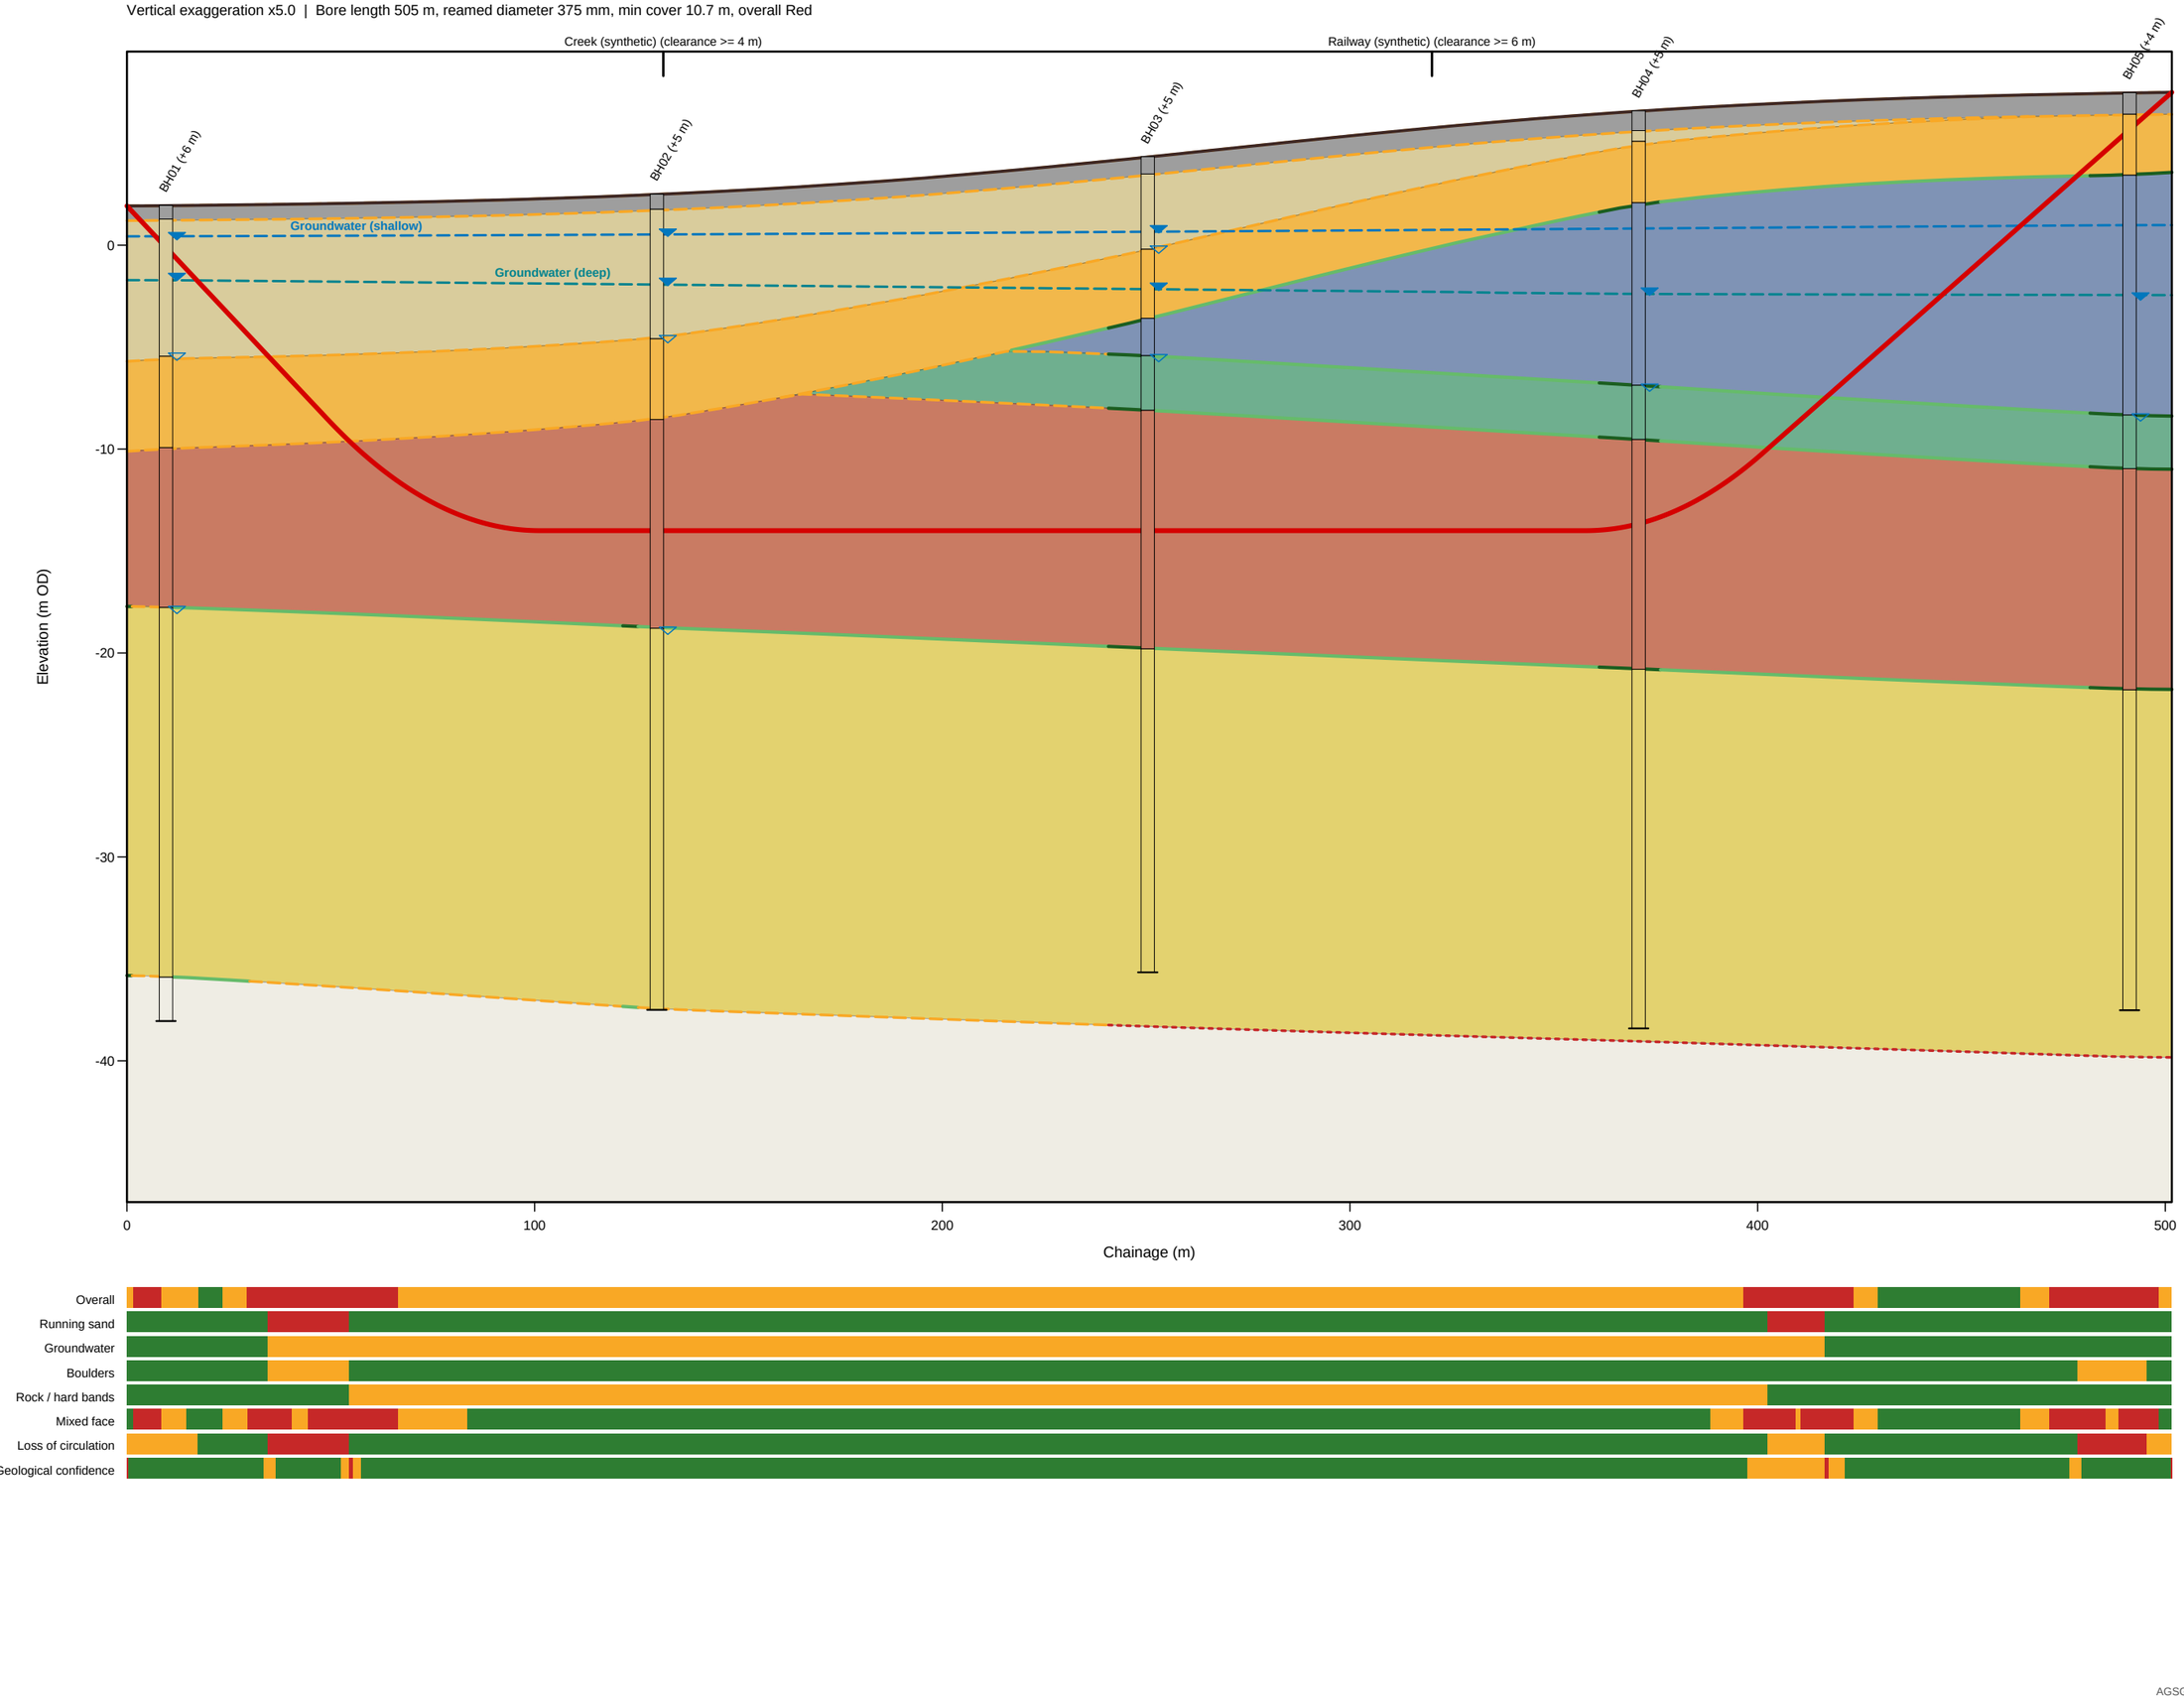
HDD-01: geological long section and ground-risk assessment

Vertical exaggeration x5.0 | Bore length 505 m, reamed diameter 375 mm, min cover 10.7 m, overall Red



Units

- Made Ground (MGR)
- Alluvium (ALV)
- River Terrace Deposits (Undifferentiated) (RTDU)
- London Clay Formation (LC)
- Harwich Formation (HWH)
- Lambeth Group (LMBE)
- Thanet Formation (TAB)
- Chalk Group (CK)

Contact confidence

- Observed
- Interpolated
- Inferred
- Speculative

RAG

- Green
- Amber
- Red

- Design bore profile

frac-out screening uses hydrostatic mud pressure only (annular friction losses not supplied): the factor of safety is optimistic
